FSI CLOUD

FSI Cloud Ltd, Exchange House, 180-182 St Mary's Lane, Upminster, Essex RM14 3BT

How Email Archiving makes it easy to preserve, protect, and recover your email.

Storage and capture features.

Email Archiving automatically captures and stores every email received by every mailbox that has activated this service.

- 100% capture across all devices.
- Includes Exchange, IMAP and POP platforms.
- Full indexing and extraction of more than 400 different file types.

- Our eight data centres are SSA E 16 audited, ISO 27001 and PCI compliant, and FISMA Moderate certified.

- Unlimited storage and unlimited scalability.

Search and restoration features.

Email Archiving ensures your data is always available to quickly search, identify and recover.

- Three different search methods.
- Search full text of all email and attachments.
- Tagging capabilities let you identify content accurately and quickly.
- Implement a "legal hold" to identify, segregate and preserve relevant data.
- Search across every mailbox in your account.
- Recover messages back to administrator's mailbox.
- Categorise results before exporting them.

Security Features.

Record authenticity and preservation is key to compliance and eDiscovery mandates. Email Archiving protects from loss, corruption, damage or misuse.

- FIPS-certified AES 256-bit encryption of stored data.
- Data is encrypted both in transit and at rest.
- WORM-compliant tamper-proof media.
- FISMA-compliant geo-replicated data centres.
- No co-mingling of data—data is stored in individual customer silos to prevent corruption.
- 99.999999999% data resiliency assures the integrity of your stored emails.

Admin and end-user features.

For both users and administrators, Intermedia's Email Archiving offers an easy-to-use integrated experience.

- Access admin and searching features via our control panel.
- Grant different levels of accessibility and permissions.
- No hardware or software licenses to buy.
- Build reports based on archive activity.
- Keep records immutably stored regardless of any attempts to alter or delete them.
- Extend end-user archive access through our online portal or within Microsoft Outlook
